PROFESSIONAL SUMMARY

B.Tech CSE student at Amity University Rajasthan (2027 batch, 7.77 CGPA) with hands-on experience building, testing and improving software in Python. Built an AI-powered Resume Analyzer using a local LLM API and a Fake Profile Detection system using machine learning, covering design, implementation, testing and evaluation. Strong problem-solving fundamentals, comfortable working with APIs and Git, and eager to contribute to hybrid-cloud and AI solutions as an Associate System Engineer.

TECHNICAL SKILLS

Programming: Python (Advanced), C++ (Intermediate), C (Intermediate), Java (Basic, OOP-certified), SQL (Basics)
SDLC & Engineering: Design, coding, testing, debugging, documentation, REST API concepts, Git/GitHub, VS Code
AI & Cloud: LLM API integration (Ollama), prompt design & testing, NLP, Machine Learning, AWS (Basic)
Web: HTML, CSS

EXPERIENCE

Data Science, AI & Machine Learning Intern — Upflairs Pvt Ltd 2 Jun 2026 – 17 Jul 2026 (Remote)

- Designed and developed an AI-powered Resume Analyzer in Python that calls Ollama's local LLM API to score resumes against job descriptions, automating a manual screening task.
- Wrote request/response handling and tested outputs across varied inputs to get consistent, structured results from the model.
- Built a Fake Profile Detection system with ML classification, taking it through preprocessing, training and evaluation.
- Applied NLP techniques (tokenization, text preprocessing, feature extraction) to analyse and solve data problems.

Web Development Intern — Prodigy InfoTech 3 Mar 2025 – 18 Apr 2025 (Remote)

- Built responsive, cross-browser web pages in HTML/CSS and collaborated with a team on frontend tasks, writing modular, maintainable code.

PROJECTS

AI-Powered Resume Analyzer — Python, NLP, Ollama API, Prompt Engineering

- Matches resumes to job descriptions by calling a local LLM via API and returning a skill-match score, reducing manual review effort.
- Designed the prompts and the request/response flow between the input workflow and the model; tested for accuracy and consistency.

Fake Profile Detection System — Python, Machine Learning

- Trained and evaluated a classification model to flag fraudulent social profiles, covering data preprocessing, training and evaluation.

EDUCATION

B.Tech, Computer Science Engineering — Amity University, Rajasthan Expected 2027 | 7.77 CGPA
Class XII — RPS Public School, Narnaul 2023 | 83%
Class X — RPS Public School, Narnaul 2021 | 87%

CERTIFICATIONS

Java with OOP (Coursera, May 2025) • Python for Data Science, AI & Development (Coursera, Jun 2025) • Crash Course on Python (Google/Coursera, Jun 2025) • Data Science with Machine Learning & AI (UpFlairs & Coursera, Jul 2025) • Web Development (Prodigy InfoTech, Apr 2025) • Deloitte Data Analytics Virtual Internship (Forage, Mar 2025)

ADDITIONAL INFORMATION

Languages: English (Professional), Hindi (Professional), French (Beginner) | **Location:** Willing to relocate across India
